5) Your questions

A 2-year master program in English

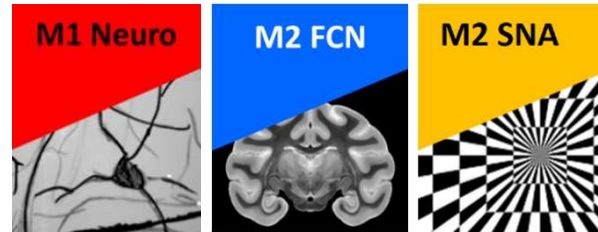

Université Claude Bernard

Lyon 1

- ✓ This highly **interdisciplinary program in Neurosciences** covers topics ranging from basic research in human and animal models to applied and translational Neurosciences.
- ✓ The Master allows students to **specialize** in their field of interest thanks to optional teaching units and specialized paths in M2, and includes extensive **practical activities in laboratories**.

A 2-year master program in English

Université Claude Bernard

Lyon 1

- ✓ The training is anchored in a rich research environment (about 700 scientists/researchers working in **4 large research institutes** in Neurosciences)
- ✓ The program **encourages international mobility**.

Neurograduate program (UCBL – ANR)

- Exchange fellowships (internships abroad)
- Individual mentoring program
- Project-based training on research platforms (state of the art techniques)

<https://neurograduate.univ-lyon1.fr>

A dense laboratory network in Neurosciences in Lyon

Internship abroad are also possible and encouraged

Stem Cell and Brain Research Institute

<http://www.sbri.fr>

Lyon Neuroscience Research Center

<http://cnrl.univ-lyon1.fr>

NeuroMyoGène Institutue

<http://www.inmg.fr>

Cognitive Sciences Institute Marc Jeannerod

<http://www.isc.cnrs.fr>

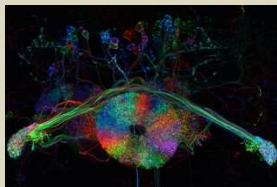

A dense laboratory network in Neurosciences in Lyon

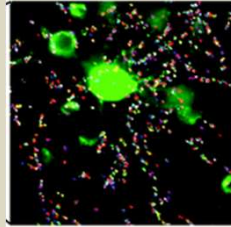

Research from cellular and molecular scale to clinical applications

Multiple methods to study the brain structure and function

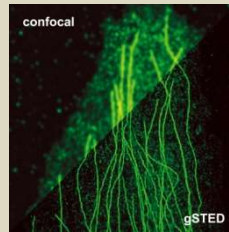

Live or high resolution microscopy

Bi-photon

Quantum dot

STED

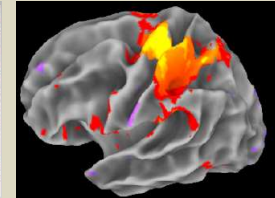

Brain imaging in primates

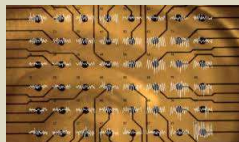

Structural MRI

EEG

fMRI

Multi-electrodes

Optogenetics

Behavior

Electrophysiology in behaving animals

Rehabilitation

Brain-machine interface

Applications

Studying in Lyon

- ✓ Lyon 1 university is one of the largest universities in France (~47000 students) in the fields of science and technology, health and sport.
- ✓ The Rhône-Alpes area is an extremely dynamic economic and academic environment (chemical and environment, digital and biotech domains).
- ✓ 2h train to Paris, 2h drive to the French Alps and 3h drive to the Mediterranean sea !!

M1 Neuro

Université Claude Bernard  Lyon 1

Semester 1 30 ECTS

Semester 2 30 ECTS

- ✓ Disciplinary Courses (Cellular Neurosciences, Integrative Neurosciences, Cognitive Neurosciences, Clinical Neurosciences, Computational Neurosciences)
- ✓ Scientific tools (Methodology, Statistics, Bibliography, Communication, Internship)
- ✓ Transversal skills (English, Insertion into a professional environment)

**Sem 2 : Optional disciplinary teaching units
help you choose your M2 path**

M1 Neuro

Université Claude Bernard  Lyon 1

First Semester

DISCIPLINARY COURSES

Properties of
Neuronal cells
(Neuron)
6 ECTS

Behavioral
Neurosciences
(Behavior)
6 ECTS

Cognitive
Neurosciences and
Neuroimaging
(NeuroCo)
6 ECTS

Methodology &
Statistics
(Methodex)
6 ECTS

Techniques for
empirical research
(TechnEx)
6 ECTS

Second Semester

DISCIPLINARY COURSES

Clinical Neurosciences
(Clinical)
6 ECTS

Physiology of neural networks
(Networks)
6 ECTS

SCIENTIFIC TOOLS

English
3 ECTS

Professional skills
(ProSkills)
3 ECTS

Neurosciences internship
6 ECTS

7 weeks

OPTIONAL UNITS

Block 1

- Sensory Measures **(Sensory)**
- Neural trace of memory **(Trace)**
- Computational Neurosciences
(NeuroComp intro)

Block 2

- Development, Disease and Regeneration
(DDR)
- Neuropsychologie **(Neuropsych)**
- Immunité

2 units from block 1 or 1 unit in each block

M2 FCN

M2 Fundamental & Clinical Neurosciences

Université Claude Bernard  Lyon 1

Selected topics covered in fundamental, clinical and applied Neurosciences

CONFERENCES with focus made on hot topics in Neurosciences research and new methodologies.

Neuroconferences *e.g. topics since 2017*

- Cellular Basis of circadian rhythms
- Neural Basis of social interactions
- Neuroimaging and brain stimulations applied to psychiatric pathologies
- Oscillations and Brain rhythms
- Changing scales in Neural Stem Cells research
- Pathophysiology of Parkinson's disease
- Language in the sensory motor brain
- Naturalistic neurosciences

OPTIONS for specialization

Molecular and Cellular Neurosciences:

Synaptic plasticity ; Brain development ; Brain repair

Neural Basis of Cognition :

Perception, Action, Plasticity, Attention, Social Cognition

Advanced Clinical Neurosciences:

Neurological and psychiatric diseases, interventions

Computational Neurosciences :

Modeling, machine learning, artificial intelligence

Neuro-immunology :

Autoimmunity, Infection, Inflammation

M2 FCN

M2 Fundamental & Clinical Neurosciences

Université Claude Bernard  Lyon 1

Job opportunities after the M2 FCN

1) **PhD program** >70% since 2018

- PhD program « Neurosciences et Cognition » in Lyon:

<http://nsco.universite-lyon.fr>

- other PhD programs worldwide (USA, Canada, England...)

2) **Additional training for dual skills** (administration, management, business, big data...) => mixed positions in private companies

3) **Other opportunities**, such as :

- R&D in private companies
- Research engineers in academia
- Scientific publishing, editing, writing
- Clinical Research Coordinator ...

For more ex (in French), see

3 ECTS

OPEN to work-study training

Teaching is project-based
and involves professionals
from the industry.

Second Semester

Full Time **Professional Internship**
30 ECTS

M2 Sensory Neurosciences & Analysis

Université Claude Bernard  Lyon 1

Job openings

Immediate professional insertion : 80-100%
PhD : 0-10%

For more details (in French), see

<https://www.univ-lyon1.fr/universite/organisation/observatoire-de-la-vie-etudiante#.YinVRnrMI2w>

✓ **Jobs:** Project manager in R&D departments (sensory design; sensory impact of manufactured products on consumers)

<https://www.linkedin.com/groups/8571955/>

✓ **Application fields:**

Cosmetic, perfumes, car industry, clothing, food, medical devices, video game...

✓ **PhD opportunities,** often in collaboration with an industry (ex. CIFRE contract in France).

✓ **Complementary training programs:** Business, management or marketing schools, big data

4) How to apply ?

5) Your questions

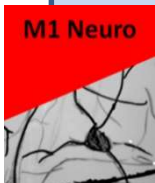

General Application rules

Application process depends on your **country of origin** and your **current administrative situation**, and the **Master's year** (M1 \neq M2)

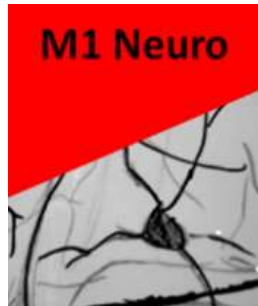

French citizen \Rightarrow <https://www.monmaster.gouv.fr>

Other citizen

- European Union \Rightarrow <https://www.monmaster.gouv.fr>
- 67 countries listed on EEF procedure \Rightarrow <https://www.campusfrance.org>
EEF = Etudes en France
- Other countries not listed on EEF \Rightarrow <https://ecandidat.univ-lyon1.fr/>

These general rules may change if you are currently residing in France, please contact the Sclarité UFR Biosciences or International Students office to enquire about your specific situation. In any case, you are responsible for obtaining a visa if required to study in France.

Application for Master 1st year

- ✓ **EEF procedure** now closed (usually opens in Fall of year N-1)
- ✓ **monmaster.gouv.fr procedure** : <https://www.monmaster.gouv.fr>
- ✓ **eCandidat procedure** : <https://ecandidat.univ-lyon1.fr/>

Select : Département de Biosciences / Master LMD / M1 Neurosciences

Calendar

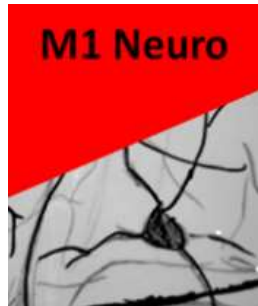

- Application procedure opening: **22th March 2023**
- Application procedure closing: **18th April 2023**
- Results publication: **23rd June 2023**
- Confirm your acceptance on the platform:
 - before **26th June 2023 @ 11.59pm** for proposal received before June 24th included,
 - **Day + 1 @ 11.59pm** for proposals received between June 25th and July 20th (complementary list)

Note 1 : A detailed instruction document is available in English on both platforms & Master's website

Note 2 : Questions related to the administrative procedure should be addressed to

candidatures.biosciences@univ-lyon1.fr

Application for Master 1st year

Université Claude Bernard  Lyon 1

Who can apply?

Students having a **deep interest in Neurosciences** and

- ✓ Holding a **Bachelor of Sciences** in Life Sciences or scientific disciplines related to Neurosciences (Cognitive Sciences, Mathematics / Informatics / Physics applied to Biology...) including

- ☐ a minimum of 12 ECTS or equivalent in Neurosciences and/or Cognitive Sciences

AND

- ☐ a minimum of 12 ECTS or equivalent in Physiology, Biology and/or Mathematics / Informatics / Physics applied to Biology...

- ✓ Holding a B2 level in **English**
- ✓ Showing **scientific skills** (scientific questioning and reasoning, ability to synthesize, to communicate...)

Application for Master 1st year

Selection criteria

Master Neuro specific form to be downloaded, completed and submitted via the platform (monmaster.gouv.fr or ecandidat)

1. Academic results

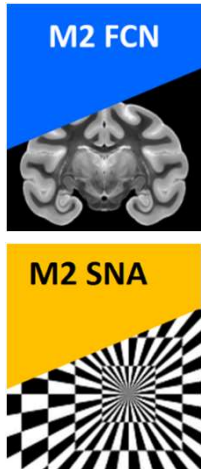

- ✓ *Evaluated on your grade certificates*

2. Acquired scientific and methodological knowledge and practical skills

- ✓ *Grades of your previous project defense and written reports*
- ✓ *A personal statement summarizing a scientific project that you developed during a course or an internship*

3. Motivation & personal project (being aware of the training program, being able to define your expectations and the adequacy of the training program with your professional project)

- ✓ *CV, cover letter, support letter(s) from previous teachers or internship supervisor*

Application for Master 2nd year

Université Claude Bernard  Lyon 1

- ✓ **EEF procedure closed** (open Fall of year N-1)
- ✓ **eCandidat procedure** : <https://ecandidat.univ-lyon1.fr/>

Select : Département de Biosciences / Master LMD /
M2 Neurosciences – prcs Fundamental and Clinical Neurosciences
or M2 Neurosciences – prcs Sensory Neurosciences and Analysis

Calendar

- Application procedure opening : **10th May 2023**
- Application procedure closing : **13th June 2023**
- Results publication : **5th July 2023**
- Confirm your acceptance on eCandidat **before 13th July 2023**
- From mid-July : calling on complementary list

Note 1 : Priority is given to students holding a M1 Neurosciences from UCB Lyon1 (French law)

Note 2 : A detailed instruction document is available in English on eCandidat and Master's website

Application for Master 2nd year

Université Claude Bernard

Lyon 1

Who can apply?

- ✓ Students holding a **1st year Master of Sciences** in Neurosciences or scientific disciplines related to Neurosciences (Cognitive Sciences, Mathematics / Informatics /Physics applied to Biology...).
- ✓ Students with a B2 level in **English**
- ✓ Students with **scientific skills** (scientific questioning, scientific reasoning, capacity to synthesize, to communicate...)

- ✓ M2 FCN is also open to medical and engineer students
- ✓ Students with a deep interest for **Research in Neurosciences**

- ✓ SNA is open to engineer students
- ✓ Students with a deep interest for **applied neurosciences in the field of sensory analysis and consumer studies in non academic organizations**

Application for Master 2nd year

Selection criteria

1. Academic results
2. Acquired scientific and methodological knowledge and practical skills
3. Motivation & personal project (being aware of the training program, being able to define your expectations and the adequacy of the training program with your professional project)

- ✓ Letter of acceptance from a qualified research lab (5-6 months internship)

- ✓ Interview of short-listed applicants (June 23rd-30th)
